## ABOUT ME

Talented frontend developer skilled in creating engaging user interfaces, collaborating effectively within a team, and ensuring customer satisfaction. Seeking a position in a company where I can leverage my abilities to drive growth, while also expanding my knowledge through exploring new concepts and technologies.

## WORK EXPERIENCE

Frontend Developer Trainee

### Sharpener (9 Months)

During my 9-month tenure at Sharpener, I underwent comprehensive training in essential frontend development skills. Engaging in diverse projects, I honed my expertise in Core Javascript, DSA, React, Redux, Hooks, Axios, Bootstrap, REST API, Firebase, and more.

Cybersecurity Analyst Associate

### Precise Testing Solutions (3 months)

As a Cybersecurity Analyst, I actively worked on projects focusing on various areas such as Vulnerability Assessment and Penetration Testing (VAPT), Secure Code Review, API Security Testing, and Cloud Security Testing.

## PROJECTS

### Expense Tracker with React

- Added Authentication for users using Firebase Authentication.
- Used Firebase Realtime Database for storing user Expenses.
- Added Dark Mode for premium users.
- Added Download Expenses CSV for premium users.
- Used Redux for state management.
- Project Github Link 

### Mailbox Client with React

- Set up routes for signup, login & mailbox using react-router.
- Users can see received and sent mails in mailbox.
- Added Authentication for users using Firebase Authentication.
- Used Firebase Realtime Database for storing user mail.
- Used Redux for state management.
- Created a custom hook for HTTP requests.
- Project Github Link 

### Portfolio Website using React

- Created wrapper components for reusability.
- Used SCSS for CSS syntax
- Used Framer-Motion for Animations.
- Used React best practices.
- Project Github Link
